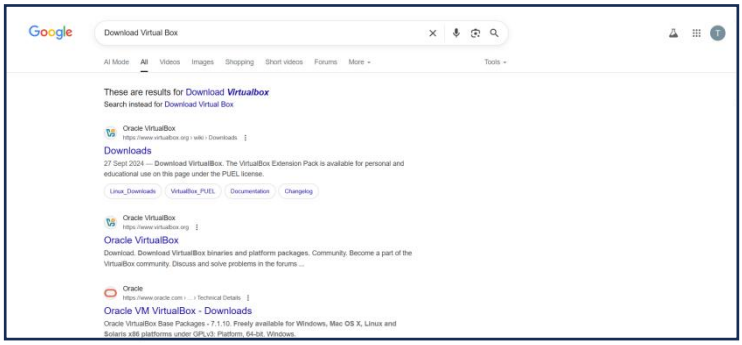
# EXPERIMENT NO.: - 01

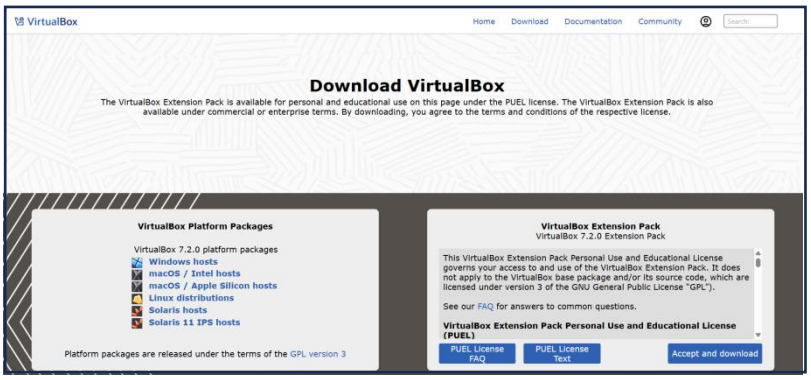
**Object: -** Download and step-by-step installation of **VMware** or **VirtualBox** on your Windows.

**Note: -** Here, I am using VirtualBox.

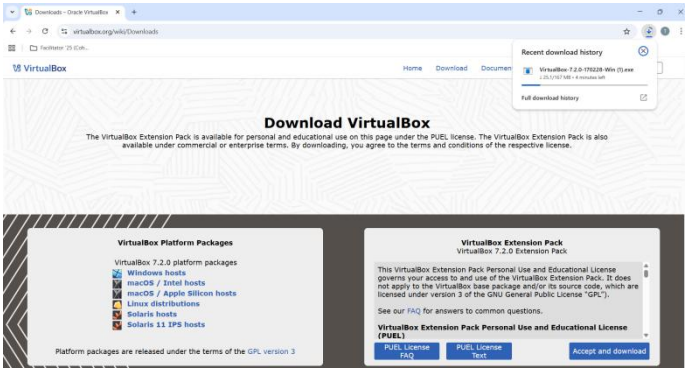
**Step 1: -** Open any browser and search for Download VirtualBox.



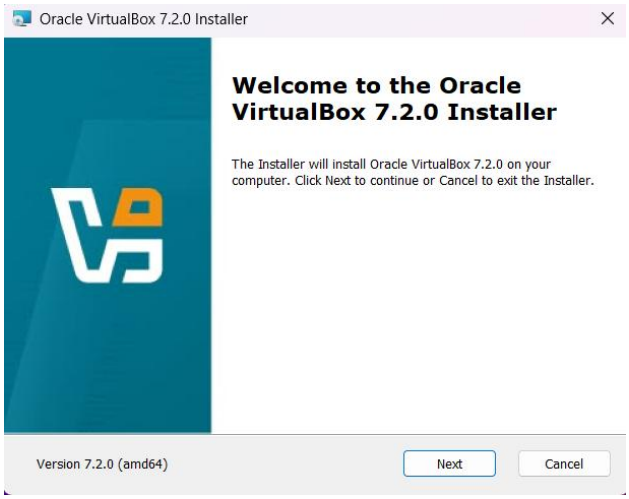
**Step 2: -** Open the first link, which is to Oracle VirtualBox (Downloads).



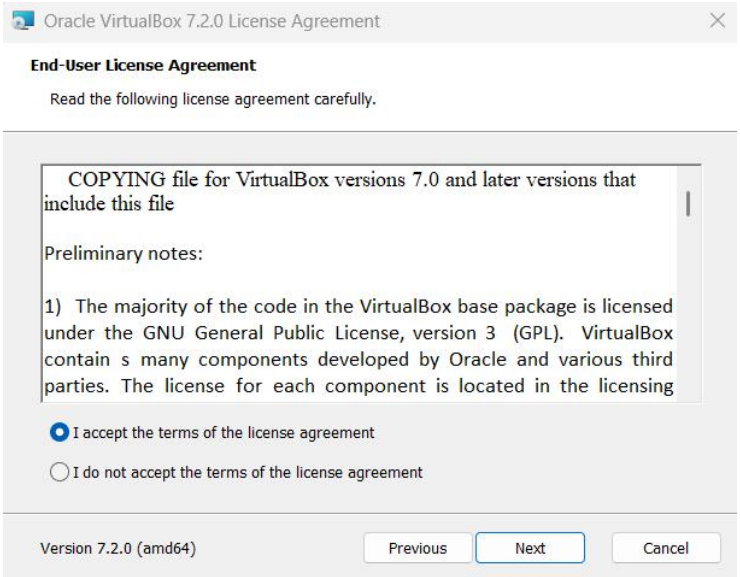
**Step 3: -** Here, in the VirtualBox Platforms Packages, click on Windows hosts, and VirtualBox will start downloading.



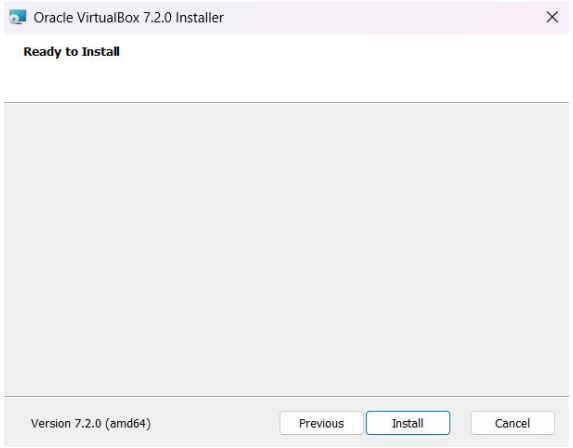
**Step 4**: - Now, open the .exe file of VirtualBox and click on Next.



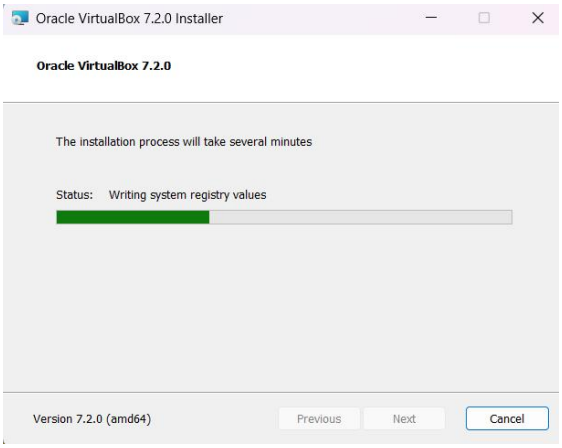
**Step 5**: - There, you will see an agreement. Click on I accept and press Next.



**Step 6**: - Click on Next until a window appears with a button of Install button, click on it, and the installation of VirtualBox will start.



→



**Step 7: -** Here, we can see that our VirtualBox is installed.

Hence, Installation of **VirtualBox** on your system is finished.
